What do we all use?

- our mobile phones and we each have one for work and one for personal use
- public transport but at least two of us sometimes drive to work
- email for work and personal use

A few of us use Facebook

And recently we all learnt how to use Microsoft Teams which means we can share files but also hold meetings using the video phones when we are in different parts of the region

Sean

- I am learning how to drive in an automatic car
- I have an Amazon Alexa device
- I use a cooker to cook my meals as I live independently with my girlfriend
- I have a game consoles that I use to play games on

Elspeth

- I have an iPad that I use to play games on
- I use my work laptop
- I have a Smart TV that I use for watching TV and other things
- I also have game consoles that I use to play games on
- And I use a microwave to cook my meals

Michelle

- I have an Amazon Alexa device which I use to manage my appointments
- I use Facetime to talk to people via video

• I tend to use taxis more than buses as none go as far as Fenland

• I have just found out that I can use Adobe Acrobat to read PDFs to me, and Outlook can read emails!

Neil

- I use a microwave and cooker for cooking my meals
- I have a laptop that I use for work
- And I watch a lot of TV

Russell

- I use an electric wheelchair - I wouldn't be able to move about without it
- I listen to Heart FM on the radio to keep me calm
- I have a laptop that I use for work
- And when I use public transport, it has to be wheelchair friendly

Bill

- I have game consoles that I play games on to help me relax and deal with stress
- I have an Amazon Alexa device that I use to keep me updated with the news
- I drive which helps me get to places that I may not be able to get to by public transport
- I have my own computer in which I do emails, blogging and watching YouTube
- And I have a virtual reality headset that I use to help me escape from reality when it gets too much for me
